

## VERSACE flagship store / ceiling, floor & desk lamp

*To integrate the shop designed by the UK Architect Jamie Fobert for the new concept of VERSACE flagship store, we have worked on taking a detail of his design and twisted it in a lamp, either ceiling suspension, either table lamp.*

*Made of brass, with two sorts of LED and two different angles of light, narrow and wide, turning on one a.x.e, bend on 90 °, it had been designed in seven shapes to never touch in the eyes of the pedestrian, and to be able to change the light of the shop easily:*

*Thierry Dreyfus chooses to have the light coming from the clothes and the accessories displays and designed this series of exclusive golden brass lamps reflecting the visitors and the clothes as in mirrors.*
